COMPANY PROFILE

(HVAC DUCTING SYSTEMS)

WWW.PRO-DUCTINDUSTRIES.COM

WELCOME TO OUR COMPANY

At PRO-DUCT INDUSTRIES, we specialize in the Manufacturing of premium Duct Work & Accessories for Commercial & Residential HVAC Applications.

We are established on the basic policy of serving the market with high-quality & reliable Products using the latest Technology & qualified staff.

Meeting and understanding the customer's requirements to achieve added value is one of our major goals. Through our sophisticated facilities, we intend to distribute and supply to AC suppliers, Contractors & Private Clients. Get our highest quality HVAC ductwork, Pre-Insulated Duct, and Aluminum Cladding at the most competitive rates.

Health, Safety & Environmental Management are integral & essential parts of the way we do our business & are considered an equal part of the wider system for our way of work.

2022
Company

OUR MISSION, VISION & VALUES

- To be an integrated duct manufacturing unit with high competitiveness and sustainable growth.
- To strive for global excellence in providing services to the HVAC industry worldwide.
- To provide services that are attractive and fair to our customers and earn their loyalty while also providing value to our shareholders.

We are committed to the relentless pursuit of providing quality products at the most competitive prices and good services available in the market.

OUR PRODUCTS

GI & PI Fabrication Duct

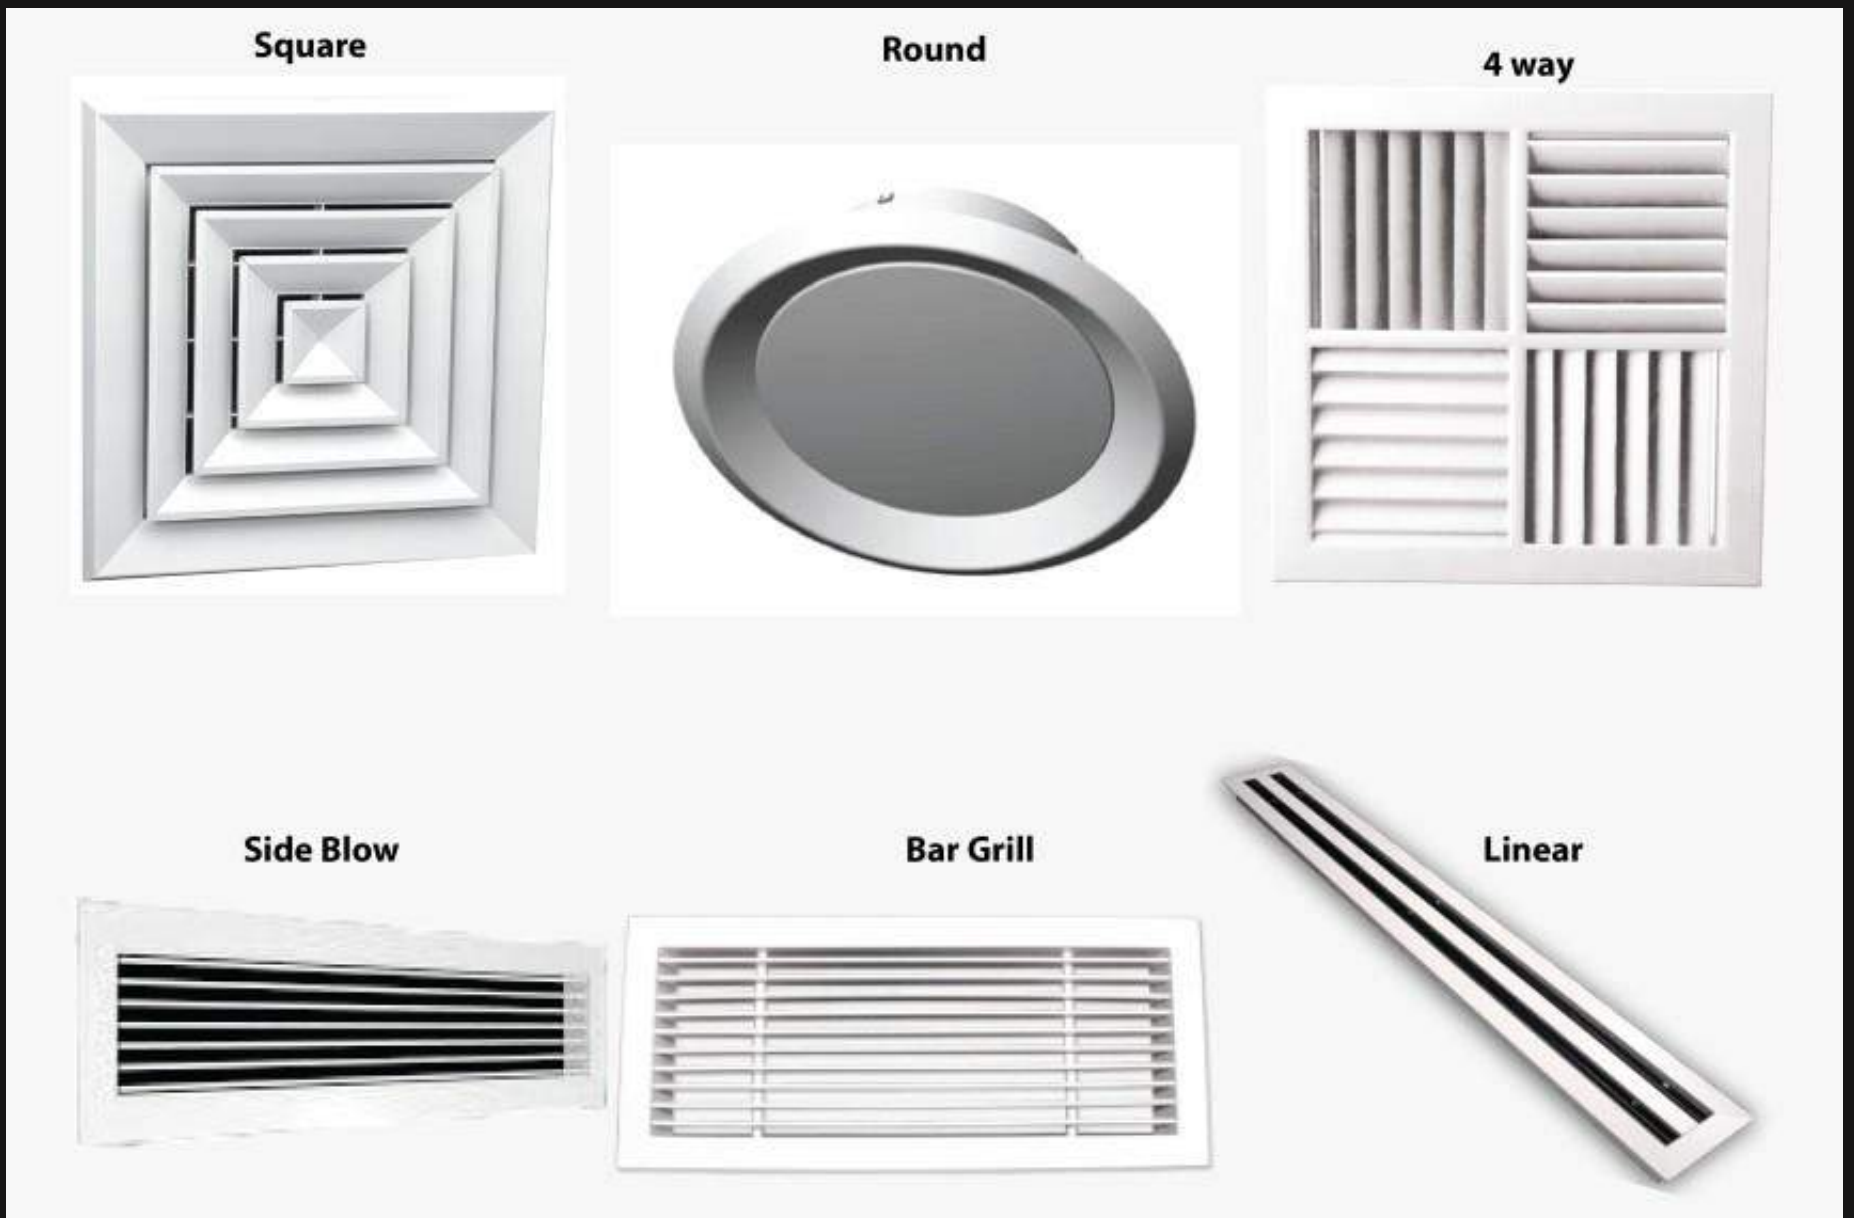

Duct fabrication is a critical process in HVAC (Heating, Ventilation, and Air Conditioning) systems, ensuring efficient airflow and environmental control within buildings. Two common materials used in duct fabrication are Galvanized Iron (GI) and Pre-Insulated (PI) panels.

DAMPERS

HVAC Dampers are essential components in heating, ventilation and air conditioning systems, designed to regulate airflow within ducts, chimneys and other air handling equipment.

OUR PRODUCTS

AIR OUTLETS

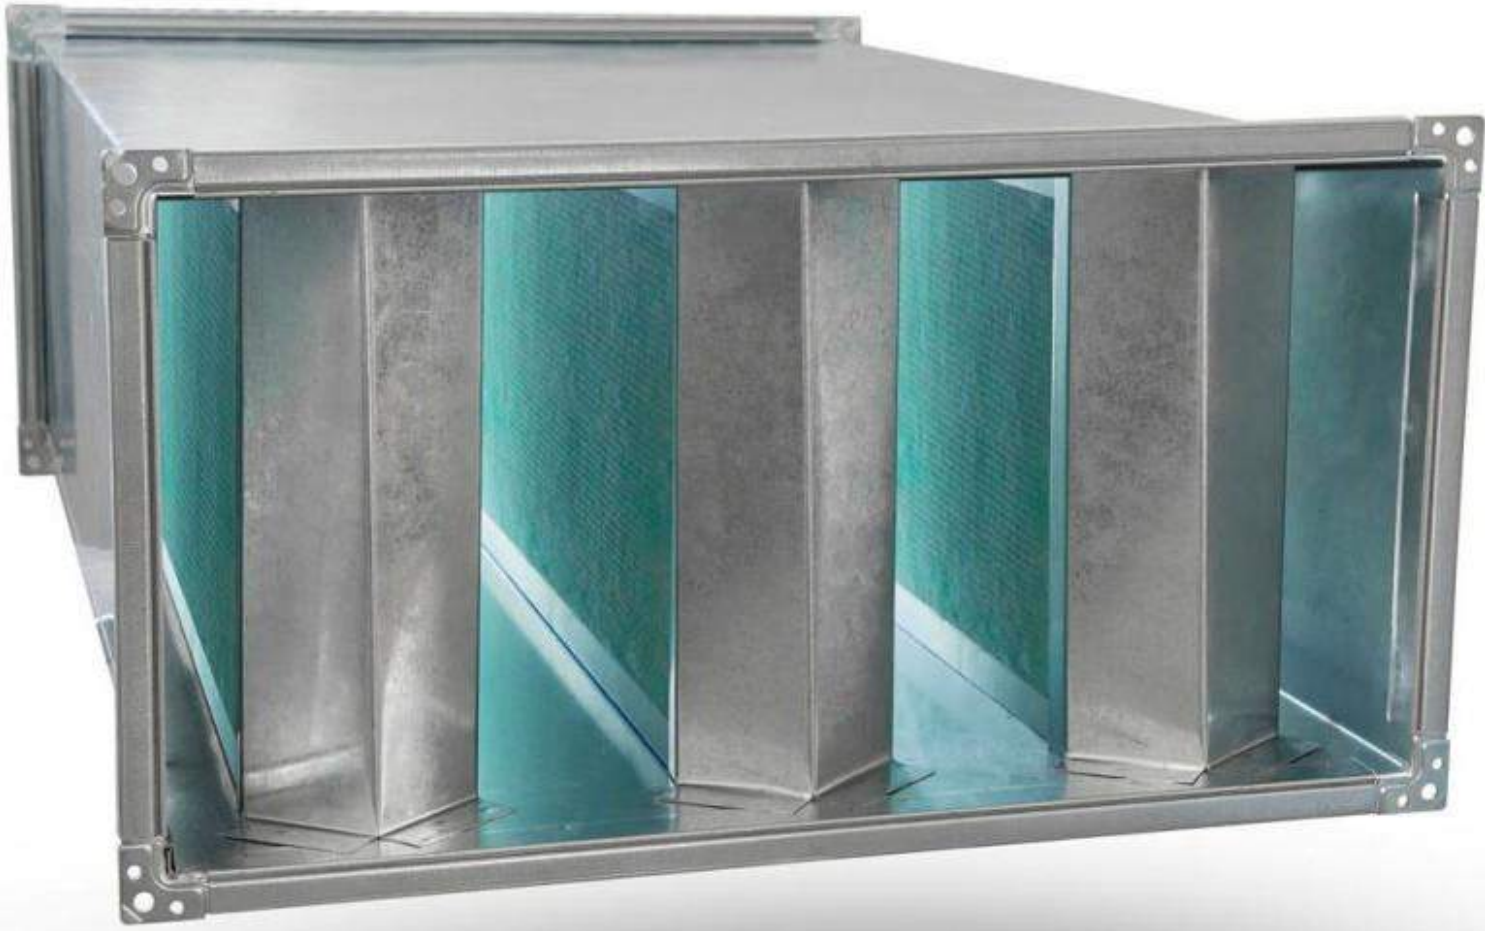

Diffusers, grilles, and registers, are essential components of heating, ventilation, and air conditioning systems. They are responsible for distributing conditioned air from the ductwork into the living or working spaces.

LOUVERS

Louvers are critical components in heating, ventilation, and air conditioning systems, designed to allow air to flow in and out of buildings while providing protection against rain, debris, and pests.

OUR PRODUCTS

SOUND ATTENUATORS

Sound Attenuators are also known as silencers are essential components used to reduce noise generated by heating, ventilation and air conditioning systems.

ACCESS DOORS

Access doors are critical components in HVAC systems, providing necessary access points for inspection, maintenance and cleaning of ductwork and other HVAC components.

OUR PRODUCTS

MS STEEL DUCT

MS Pro-Duct Industries is a leading manufacturer specializing in the production of high-quality mild steel (MS) ducts tailored for kitchen extract systems and various industrial applications. Our products are designed to meet the highest standards of performance, durability, and safety, ensuring optimal functionality in demanding environments.

At Pro-Duct Industries, we are committed to delivering top-quality MS ducts that meet the unique needs of both kitchen extract and industrial applications. Our dedication to excellence ensures that our products not only meet but exceed industry expectations.

ALUMINUM CLADDING

Our product line specializes in producing high-quality ducts with cladding designed specifically for external and plant room installations. These ducts are engineered to provide superior protection, insulation, and durability, ensuring optimal performance in diverse environmental conditions.

By focusing on specialized duct solutions with advanced cladding, we deliver products that excel in both performance and reliability, catering to the specific needs of external and plant room installations.

MANUFACTURING PROCESS

CUTTING

The first stage in the manufacturing process is cutting. Fittings can be done by our Plasma machines that can guarantee precise dimensions, whereas the Straight Ducts undergo the cutting process by the Coil Line sector.

ASSEMBLY

The second stage in the manufacturing process is Assembly. In the assembly stage, all ducts are processed into different machines as per the client's specifications, such machines include lock forming machine, NU lock machine, folding machine, flange forming and cleats forming.

OUR FACTORY PROCESS

PROCUREMENT

At PRO-DUCT Industries, we procure material in accordance to projects specifications, international standards and consultant's/clients approvals.

MANUFACTURING

At PRO-DUCT Industries, we ensure accurate fabrication for all Duct/HVAC products from the technical expertise available at our factory. All products are manufactured based on the specifications of our clients.

DELIVERY

PRO-DUCT Industries always makes sure to build the best reputation when it comes to on time delivery. We are fully committed on delivering your products & materials on time in order to guarantee customer satisfaction.

OUR FACTORY PROCESS

QUALITY CONTROL

The third stage in the manufacturing process is Quality control. It is the final process where our team review the quality of all factors involved in production in order to meet high standards.
